*When I am working on a problem, I never think about beauty but when I have finished, if the solution is not beautiful, I know it is wrong. We are called to be architects of the future, not its victims. There is nothing in a caterpillar that tells you it's going to be a butterfly. Love is metaphysical gravity. Don't fight forces, use them. Integrity is the essence of everything successful. Everyone is born a genius, but the process of living de-geniuses them. Humanity is acquiring all the right technology for all the wrong reasons.*
